PROFESSIONAL SUMMARY

Analyst with mid-level experience driving data-informed decisions for SaaS product, sales, and operations teams. Delivered \$1.2 M ARR growth and a 19.8 % lift in conversion by building SQL/Tableau dashboards, automating reporting pipelines, and leading experimentation. Saved \$420 K annually and eliminated 85 hours per week of manual work through AI-assisted workflows and cross-functional analytics. Seeking to apply analytical expertise to accelerate product growth and operational efficiency.

CORE COMPETENCIES

- **Product & Analytics:** Product & Business Analytics, Revenue & Pipeline Analytics, Salesforce CRM, SaaS, KPI Frameworks, Customer Segmentation, A/B Testing, Cohort Analysis, Reporting
- **Data & BI Tools:** SQL, Python, BigQuery, Advanced Excel, Data Modeling, Statistical Analysis, Snowflake, Power BI, Tableau
- **Product & Growth Tools:** Amplitude, Google Analytics, Mixpanel, Optimizely, Salesforce, Zendesk, Stripe, Google Cloud Platform (GCP)
- **Additional Strengths:** AI-Assisted Workflows, UX Design, Cross-functional Collaboration, Stakeholder Management
- **Certifications:** Google Project Management, AWS Cloud Practitioner, Salesforce AI Associate & Agentforce Specialist, Google Analytics

PROFESSIONAL EXPERIENCE

Tungsten Automation

Jul 2024 - Present

Product Analyst (Product Management Focus)

Remote, USA

- Built SQL and Tableau dashboards tracking SaaS revenue performance, pipeline health, customer engagement, and product adoption, enabling leadership to monitor business performance and make strategic decisions.
- Analyzed 45M+ monthly product and customer events across Snowflake, Salesforce, Stripe, and Zendesk, uncovering growth opportunities and operational bottlenecks that reduced churn by 4%.
- Increased conversion by 19.8% and contributed \$1.2M ARR growth through onboarding funnel analysis, experimentation support, and UX-focused product recommendations.
- Designed KPI frameworks and executive dashboards used by 120+ stakeholders across Product, Sales, Marketing, and Operations teams.
- Automated reporting pipelines across Salesforce, Stripe, and Zendesk, eliminating 85 hours/week of manual reporting and improving data accuracy.
- Conducted customer and market segmentation analyses using SQL and Tableau, uncovering new revenue opportunities, sharpening sales targeting, and informing go-to-market planning
- Performed pipeline and funnel analysis with Python and BigQuery, identified conversion gaps, and recommended process changes that improved subscription lifecycle performance
- Applied AI-assisted workflows to synthesize product feedback, support trends, and stakeholder inputs into faster, decision-ready insights.
- Identified inefficiencies through data analysis and process optimization, reducing annual costs by \$420K.
- Environment: SQL (Advanced), Python (pandas, numpy), BigQuery, Tableau, Power BI, Looker Studio, Amplitude, GA4, Segment, Optimizely, Salesforce, Stripe, Zendesk, Airflow, GCP, Agile/Scrum

Magna Infotech

Mar 2020 - Dec 2021

Business Analyst, Product

India

- Conducted sales funnel and product performance analysis using SQL and Python, uncovering key growth opportunities that boosted conversion rates
- Increased checkout conversion 14% and feature adoption 22% through A/B testing, funnel optimisation, and customer behaviour analysis.
- Built Tableau and Power BI dashboards that visualised product KPIs, revenue performance, adoption metrics, and engagement trends, enabling faster data-driven decisions across teams
- Performed customer segmentation and retention analysis to pinpoint churn drivers, leading to targeted engagement initiatives that lowered churn
- Automated analytics workflows and reporting pipelines, reducing reporting time 25% across Product, Sales, and Operations teams.
- Delivered executive business review insights and performance reports using Tableau and Power BI, enabling leadership to make data-driven decisions that improved quarterly planning
- Converted business requirements into detailed technical specifications for engineering, coordinating with product and analytics teams; this alignment reduced development rework and accelerated feature delivery
- Defined KPI frameworks and tracked post-launch performance with Google Analytics and Salesforce CRM for go-to-market initiatives, allowing the product team to monitor adoption and refine strategy
- Used SQL, Python, Tableau, Power BI, Google Analytics, and Salesforce CRM within an Agile/Scrum environment to analyze data and support product decisions, improving reporting efficiency
- Built and maintained dashboards and data pipelines with SQL, Python, BigQuery, Tableau, Power BI, Google Analytics, Salesforce CRM, and advanced Excel in Agile/Scrum projects tracked in JIRA and documented in Confluence, enhancing data accessibility for cross-functional teams.

EDUCATION

California State University, Sacramento

Jan 2022 - Dec 2024

Master of Science, Electrical and Electronics Engineering
